

Approvals & Compliance

Concept to completion and beyond

e2m.com.au

From strategic advisory services to document preparation and risk assessments through to field surveys, our team provide the approvals and compliance insights your project needs to achieve balanced environmental outcomes.

Our Services

We're here to help our clients:

- ✓ Navigate the complexities of evolving regulatory demands
- ✓ Support approvals delivery across the project lifecycle, from site selection and project definition through to assessment, construction and operations
- ✓ Demonstrate compliance with conditions of approval throughout operations to cessation

Support throughout the project delivery lifecycle

We're here to support you from project inception to completion and beyond - what really matters is setting your project up for success.

We work with you to identify issues that will impact project design, scheduling and cost including:

- ✓ Developing strategies to minimise approvals delivery risk
- ✓ Site selection and optioneering
- ✓ Impact assessment and permitting
- ✓ Regulatory compliance during design, construction and operation.

Why E2M

Expertise

Our team comprises highly skilled professionals with practical experience in approvals and compliance.

Integration

We're Queensland's largest team of ecologists with a detailed understanding of project issues from the ground-up.

By integrating ecology and GIS with approvals, we provide end to end reassurance and control.

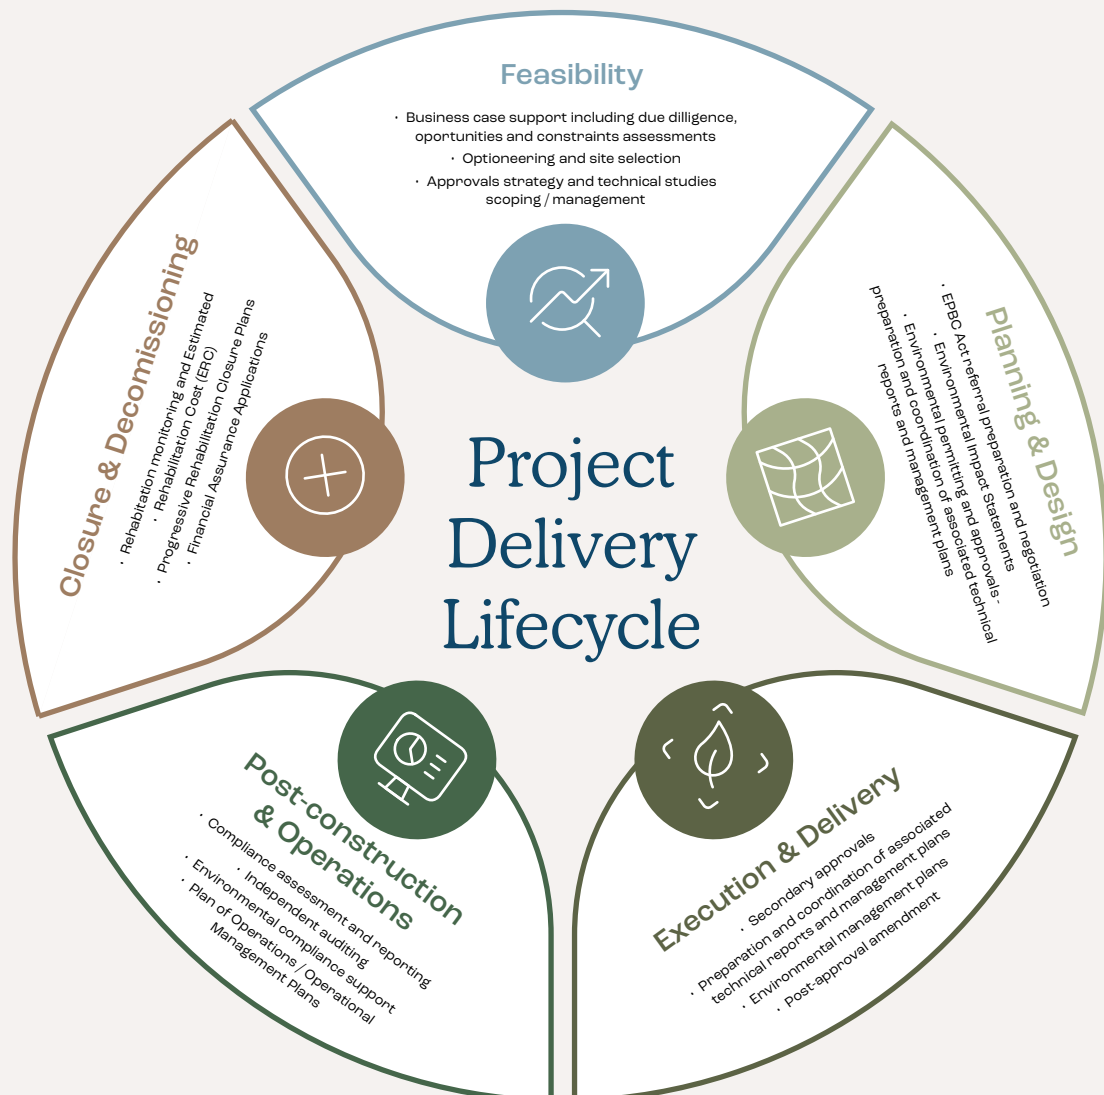

Commitment

Our commitment and track record in approvals and compliance provides assurance of sustainable practices and environmental stewardship.

Collaboration

We're known for working as a trusted advisor and extension of your team, bringing together clients, communities, and stakeholders to achieve balanced and practical outcomes.

Meet our Expert

Susan Lodge

Susan brings over 20 years of experience in leading teams in environmental planning, impact assessments and approvals, supporting delivery from business case development to operation. With deep knowledge and hands on experience of planning and environmental legislation, Susan ensures successful delivery under State and Commonwealth approvals frameworks.

We're here to help you achieve the approvals and compliance goals your project needs to achieve balanced environmental outcomes.
